

## Turn on the Spotlight

Jump on the Internet and connect directly into the fastest and easiest to use rail tracking system available. You can be set up and managing your cars in no time.

**Spotlight** lets you take advantage of the latest remote access technology so you can focus on what you know best – your rail fleet. Whether it's railcars or containers, let us collect your rail moves. We'll handle the fleet updates, the daily report generation, and all of the computer-related functions. We can even distribute the rail information to your co-workers and customers. Any of the information created in **Spotlight** can be printed to your printer or sent out to designated recipients by fax, email, or FTP. We can even place web-based reports on any web site for easy access.

Add your shipping information to **Spotlight** and you can produce some powerful statistical reports directly out of our system. You can move **Spotlight** data into Microsoft Word or Excel or Seagate Crystal Reports at the click of the mouse button. That way you can create sophisticated reports and charts of your own design.

You have all this power and more at your fingertips any time you need it.

# Spotlight

**Click a button to:**  
Instantly see the current locations of all of your cars with non-movement days and ETAs to their destinations...

...or edit the actual movement information...

**You can also click a button to:**  
Open and edit any table in the system...

- ...or sort the current sightings by FleetID...
- ...or locate any shipment instantly...
- ...or take quick notes while on the phone...
- ...or leave messages for other users...
- ...or transfer data files to and from your PC...
- ...or see the history of any railcar or container...
- ...and much, much more!

## This is the Spotlight Control Center...

Everything you need to track your railcars is right in front of you... ready to go at the click of a button. Group your cars the way you need to see them and then save the "view". The next time you want to see them, they'll be only one click away.

**Here's a sample standard report:**

**Click a button to:**  
Open an existing report...

... or design new reports...

... or query any table in your system...
